Program Review & Investigation

Honorable William K. Reilly
Administrator
Environmental Protection Agency
401 M Street, S.W.
Washington, DC 20460

Dear Mr. Reilly:

I understand that a gasoline performance additive called HiTEC 3000 seems to significantly reduce smog-producing nitrogen oxide, as well as overall tailpipe emissions. I also understand that the additive is readily available and compatible with the reformulated fuels being considered for widespread use in this country.

As air pollution is a major problem throughout the country, it is of the utmost importance that we find ways to improve our air quality and work toward reducing air pollution. It is my hope that this additive be given every consideration by the Environmental Protection Agency.

Sincerely,

A handwritten signature in cursive script that reads "Adrian K. Arnold".

Adrian K. Arnold
State Representative
